

£200 offer for every home and business in Hockerton

Dear Hockerton resident,

Sustainable Hockerton is pleased to announce a second offer of £200 to every home and business in the parish for energy and water-saving measures, funded by income from Sustainable Hockerton's wind turbine and solar PV systems.

There is a further pot of money for sustainable development of the parish, do get in touch if you have an idea you wish to take forward.

Liz Lainé, on behalf of Sustainable Hockerton Ltd

How do I claim my £200?

Each home and business in the Parish of Hockerton can claim up to £200 towards installing the products and services named below. Just provide the receipt by 31 March 2017 and we'll provide the cheque.

Contact enquiries@sustainablehockerton.org or call 01636 816902 to find out more or claim your cash.

Keep heat in

Draught proofing and **lagging** help keep homes cool and comfortable in hot weather whilst saving around £75 a year, and a **hot water tank jacket** could save £45 each year. **Wall and loft insulation** and window treatments such as **thermal-lined curtains** or **thermal blinds** can keep heat in and noise out - useful for those residents living by the A617!

Water saving

If you want to manage your energy and water bills then conservation makes good sense. How about **water efficient taps?** A **water efficient shower head** costs around £27 and can save a family of four around £75 a year on water heating, and another £90 if they have a water meter. Or how about a **water butt** to save water and money in the garden?

See the light!

Energy efficient bulbs such as **LED lights** last as much as 50 times as long as incandescent bulbs, saving money on energy use and new bulbs, but this is only a sustainable option if the light quality is good enough. Look for a warm white or soft white bulb or a Colour Rendering Index (CRI) of at least 80. Get more advice [on the Energy Saving Trust website](#) and look for the EST Recommended label.

After recently moving we were completely oblivious of the poor level of insulation in our large loft. Over the winter the house was freezing cold and the frequent supplies of oil to keep it warm were extremely costly. At the time Sustainable Hockerton was offering support with environmental initiatives and they certainly came to our rescue in part funding loft insulation. Since then we have undertaken other projects such as insulated linings for curtains to conserve heat and we are gradually replacing bulbs with more eco options.

*I have now re-bulbed the whole house. Has certainly made a difference – my 32 day electricity consumption for Nov-Dec period appears to be 25% below annual average for a month which given it is a winter month is fantastic!!
Thanks to SHOCK for encouraging me to make the change*

The small print

Open to both owner-occupied and rented homes (subject to relevant permissions) and to business premises in the Parish of Hockerton. Advice on measures is available from the [Energy Saving Trust](#) and [Waterwise](#). Participants will need to provide a comment on their use of the offer to help inspire others and inform future projects. Such comments may be used on our website or other media. Personal details will be protected. [Trustmark](#) advises on reputable tradesmen. Please support local businesses such as local builders and handymen, and suppliers such as the [Handicentre](#) or [Christys Interiors](#) where possible. And please get in touch if there is a measure you want to install but is not listed - particularly if it is one recommended by the [Energy Saving Trust](#) and [Waterwise](#) - or if you have an idea that you want to take forward that will support the economic, social and environmental wellbeing of the village but is in need of financial assistance.

If you require this leaflet in large print, please call us on 01636 816902.
